

How to do fill out a notification form for syphilis

Go to website

https://surv.esr.cri.nz/public_health_surveillance/sti_surveillance.php

Which takes you to the page below:

The screenshot shows the 'Surveillance of Sexually Transmitted Infections' page on the ESR website. The page is dated Thursday 20th December 2018. The main content area is titled 'Surveillance of Sexually Transmitted Infections' and describes the STI surveillance systems. It lists several categories of surveillance, including notifications of gonorrhoea and syphilis, laboratory-based surveillance of chlamydia and gonorrhoea, and clinic-based surveillance of chlamydia, gonorrhoea, syphilis, genital warts, genital herpes, non-specific urethritis (NSU), chancroid, granuloma inguinale (GI), and lymphogranuloma venereum (LGV). The page also mentions surveillance for AIDS and HIV undertaken by the AIDS Epidemiology Group.

Under the 'Notifications' section, there are two sub-sections: 'Gonorrhoea' and 'Syphilis'. The 'Gonorrhoea' section provides a link to the Ministry of Health notification case definition for gonorrhoea and states that all health practitioners notifying cases of gonorrhoea should complete a web-based questionnaire. Instructions on how to access and complete the questionnaire can be found here: [Gonorrhoea questionnaire instructions](#).

The 'Syphilis' section provides a link to the Ministry of Health notification case definition for syphilis, noting that late latent and tertiary syphilis are not notifiable. It states that the majority of infectious syphilis cases are notified by sexual health clinics who have access to a web-based REDCap database to input their data directly. [REDCap instructions for sexual health clinics](#). Health practitioners working outside sexual health clinics who diagnose infectious or congenital syphilis cases are required to complete a questionnaire and send it to ESR for entry into REDCap (further instructions are in the form). Please select the appropriate form below.

Case questionnaires:
[Syphilis infectious form \(Word\)](#)
[Syphilis infectious PDF](#)
[Syphilis congenital fillable form \(Word\)](#)
[Syphilis congenital PDF](#)

A red arrow points from the 'Syphilis congenital fillable form (Word)' link to a yellow box containing the text: 'Choose appropriate form, fill out, and post/fax as per instructions on form'.

The left sidebar contains 'SITE CONTENTS' with links to Home, Public Health Surveillance, Notifiable diseases, Outbreaks, Sexually transmitted infections (highlighted), Influenza viruses, Respiratory, enteric and herpes viruses, Surveillance Reports, EpiSurv, LabSurv, Antimicrobial Resistance, Virological Surveillance, Enteric Reference Laboratory, Environmental Health Indicators, EARS, Links To Other Sites, and Contact Us.

The right sidebar contains a search bar and a 'CONTACT US' section with contact information: Ph: +64 4 914 0700 Fax: +64 4 914 0770 Email: survqueries@esr.cri.nz.
